

Brickform Color Hardener Concrete Colorant and Hardener

Brickform Color Hardener is an engineered blend of pigments, portland cement and fine aggregates, used to color the surface of newly placed concrete. Color Hardener is designed to work with imprinting tools to produce clear, sharp impressions that enhance the finished appearance of any new hardscape. Color Hardener can be used to create opaque finishes or as a complementary color to integrally colored concrete.

- 90 to 120 ft² per 60 lb pail
- Denser, more durable surface

CH- 42 Standard Colors
(Including black and white)

5 Gallon
Bucket

Brickform Antique-It Antiquing Agent

Antique-It is a water-soluble antiquing agent designed to impart a secondary color or to highlight stamped concrete or textured overlays. Antique-It is easy to apply, dries fast, and provides a durable color that closely resembles the look of antique release powder. Use Antique-It on newly placed hardened concrete or to rejuvenate old stamped concrete.

- 1600 to 2000 ft² per kit
- Easy application
- Unlimited effects and color combinations
- Dust free application

AN- 42 Standard Colors
(Including black and white)

3 lb container

Brickform Powdered Integral Color

Brickform Powdered Color is a quality assured uniform blend of pure iron oxide pigment packaged in pre-measured dissolving re-pulpable paper bags that are added at the ready-mix batch plant or at the jobsite. Brickform Powdered Color disperses evenly throughout the concrete mix and complies with ASTM C979 "Pigments for Integrally Colored Concrete". Brickform's System Approach provides the professional contractor the tools necessary for uniform batching, finishing, curing, and sealing to ensure the uniformity of architectural concrete* High volume orders may require bulk packaging

- Pre-measured dissolving re-pulpable paper bags.
- UV-resistant
- Mixes evenly
- Meets ASTM C979

Brickform Ultra-M1x ^{NEW} Integral Concrete Color with UltraFiber 500

Brickform Ultra-M1x is a blend of pure iron oxide pigment and UltraFiber 500, packaged in a pre-measured re-pulpable paper bag. Ultra-M1x offers a premium color system combined with the added benefit of UltraFiber 500 in the mix. Ultra-M1x can be added at the ready-mix batch plant or at the jobsite and complies with ASTM C979 "Pigments for Integrally Colored Concrete." Brickform Ultra-M1x requires no measuring and disperses evenly throughout the concrete mix. Ultra-M1x is the perfect choice for architectural concrete on residential, commercial, and municipal applications.

- One bag per cubic yard (6-sack)
- Fiber reinforced
- Reduces plastic shrinkage cracking
- 20 premium colors

Brickform Blush-Tone Acid Stain Chemical Stain for Concrete

Brickform Blush-Tone Acid Stain reacts with minerals that exist in newly cured or existing concrete. It penetrates the very top layer of the concrete with color that will not chip, crack, or peel. The colors produced in each section of concrete will be unique with captivating, multi-colored intensities that become a permanent part of the concrete. Brickform Blush-Tone Acid Stain is available in 10 standard colors.

- 200 to 300 ft² per gallon
- Penetrating chemical stain
- Variegated color
- Will not chip, crack, or peel
- Use on floors and walls

Brickform ARTesian Stain Penetrating, Water-Based Stain

ARTesian stains are penetrating, water-based stains that produce unique color effects in finished cementitious surfaces, simulating the natural shadings and aged appearance of stone or masonry. ARTesian stain may be applied over smooth troweled or textured concrete, cement-based overlayers, vertical or horizontal concrete and masonry surfaces, artificial rock displays, water features and themed finishes.

- 250 to 300 ft² per gallon
- Contains no acid
- Zero VOC
- Water-based
- Interior/exterior use
- Apply with sprayer
- Must be sealed

Brickform Pro-Dye PLUS
Penetrating Stain for Concrete

Brickform Pro-Dye *PLUS* has been reformulated to a liquid form and is now easier to use than before. Pro-Dye *PLUS* is available in the same 25 standard colors and produces the same beautiful results. Pro-Dye *PLUS* penetrates the surface of concrete, creating a layer of translucent color that dries quickly and will not chip, crack, or peel. Pro-Dye *PLUS* is packaged in liquid form to be mixed in proportion with acetone or water. Pro-Dye *PLUS* is designed to work with the Lythic Polishing System for the coloring process in polishing floors. Pro-Dye *PLUS* mixed with acetone is also excellent in vertical applications, stencils, and logos because it dries quickly. Pro-Dye *PLUS* colors are vivid with unique multi-colored intensities, similar to the mottling effect of acid stain. Colors can be combined to create an unlimited number of color variations.

- 200 to 600 ft² per gallon
- Interior use only
- Easy to spray apply
- Dries quickly (acetone)
- Use any Brickform spray-on sealer

Disclaimer - When choosing colors, use the appropriate Brickform color selection guide for more accurate matching. Colors shown here display only the range of Brickform options available. To confirm an exact color, have your contractor prepare a color sample for your approval before actual construction. Brickform accepts no responsibility for color matching or misprints.

Refresh

Exterior Penetrating Stain

Brickform Refresh is a solvent-based, semi-opaque stain used to impart color on unsealed, porous concrete and masonry surfaces. Refresh is great for correcting surface discoloration, upgrading existing concrete, or blending together multiple pours of integrally colored concrete. For added protection and color enhancement, Refresh can be sealed using spray-applied Brickform Gem-Seal or Poly-Seal.

- 1000 to 1500 ft² per pail
- Provides sealing properties
- UV resistant
- Available in Brickform and Solomon integral colors
- Available in RTU and Concentrate

Coordinating SwissMex sprayer DS-8040, DS-8350 or DS-8400. See pg 52 for more information.
